

PRESS RELEASE

October 2011

UK CAA Approved Training Provider – Attestation of Initial Cabin Crew Training

CAA award approval for a further 2 years Allowing us to continue to deliver Attestations for Cabin Crew

(under the umbrella of our sister training company Active Plane Training)

Active Plane Training's 9 day Cabin Crew Initial Course covers all requirements as per EU OPS 1. This training is now available to both operators and individuals. Individuals wishing to better their chances of employment as cabin crew with an operator are able to obtain this qualification, this will demonstrate to companies their dedication and ability to be cabin crew. Cabin crew initial training is very intensive and operators find that some individuals are not able to complete and pass this training for a number of reasons. This is very expensive for companies. Candidates already holding an Attestation in Cabin Crew Initial Training have already demonstrated their ability to pass the course making them preferred candidates for employment.
